

The revisiting of a classic: the baroque table lamp. The revolutionary feature of this lamp is that it is made entirely of transparent or batch-dyed polycarbonate. On the one hand, it is classical, rich and traditional, and on the other, it is innovative, transparent and ironic. The quality of the material and its extremely high-quality processing lend it the resemblance of a precious, crystal table lamp. The baroque style base is composed of three decorated layers that interconnect, and the large lampshade is made with a plissé effect, to create a myriad play of reflections once the lamp is turned on. Thanks to a special coupling system on the lampshade, it can be assembled at three different heights: 68, 73 and 78 centimetres. You can choose to assemble it at the height you prefer and, later, modify it according to your preferred use. In this way, Bourgie takes on greater personality, giving the user the possibility to transform it instantly into a splendid decorative table or desk lamp.
